# Digital Development Strategy

# Digital Nation

## Digital Transformation effort composed of 3 pillars

### Digital Government

Modernize and enhance government technology and platforms to improve access to services and data for citizens and businesses.

### Digital Society

Equip citizens with the digital skills, tools, and opportunities necessary to fully participate in the digital economy and society.

### Digital Business

Support businesses and industries in Azerbaijan to digitalize, adapt, and excel in the evolving digital economy, fostering innovation.

## Foundation: 4 Transformation Enablers

 <b>Infrastructure</b>	Network access and quality (mobile and fixed broadband)	G-Cloud Data Center	5G	IoT	
 <b>Law, Regulations and Policies</b>	Digital Code	E-signature	Data Strategy	AI Strategy	Cybersecurity Strategy
 <b>AI &amp; Data Ecosystem, Cybersecurity</b>	Open Data	Consent Management		R&D	
 <b>Human capital (Capacity Building)</b>	Digital Academy	ACC (Technion)	Technest	Holberton School (peer-to-peer learning)	

# Strategic imperatives for Digital Development representing top-level KPIs of 2024-2026 program

## Digital Government

- 1 Digital-first interaction with citizens and business: all life events consumed digitally**
  - 10+ e2e digitalized life events
  - Achieve 85% satisfaction rate for e-services
  - Implement high-impact AI use cases across all government entities
  - 100% government payments available online
  - 100% adoption of Digital Login
  - Top-40 EGDl
- 2 Digital government: all internal processes digitalized**
  - 80% of internal government processes digitalized
  - 100% of G2\* paperless transactions
  - 90% data completeness and accuracy (base registry)
  - Cross agency data sharing takes less than 7 days
  - 10 High impact data-driven use cases
- 3 Open government:**
  - Hosting 1000+ datasets on the Open Data portal
  - Implementation of 15 new services based on the Open Data portal<sup>1</sup>
  - 10 Digital Services by Open API<sup>1</sup>

## Digital Society

- 4 Digitally literate population: possessing the necessary skills to navigate in digital environment**
  - Basic digital skills are 65%
  - Usage of Digital ID by 1M citizens
  - 4M Digital Login Users
  - 3M citizens have e-signature
  - 70% Cashless payment\*
  - If service is digitally available 80% of transactions are consumed digitally
  - 65% cyber awareness of citizens

## Digital Business

- 5 Digitally literate population: possessing the necessary skills to navigate in digital environment**
  - 70% SME digital presence
  - 500 SME digitization
  - Grow e-commerce by 20%
  - 65% cyber awareness of businesses

\* Cashless payment share in 2023 is 56%

\*\* e-commerce volume in 2023 is 39.2B AZN

# Strategic imperatives for Digital Transformation represent top-level KPIs of program 2024-2026

Digital Government

Digital Society

Digital Business

Enablers

## Laws and Regulations

*Build digital regulations*

- Digital ready regulation and frameworks – Digital Code, Digital Strategy, AI Strategy, Cyber Strategy
- 100% centralized PMO
- 100% centralized Budget approval
- Development of Standards and Frameworks
- 100% "digital by default" and "once only" adoption

## Human capital

*Build 'digital muscle' to enable Digital Transformation*

- All government employees have minimum digital literacy
- Educating 10,000 government personnel on data literacy skills
- 15000 IT specialists trained
- 65% cyber awareness of business and citizens

## Infrastructure

*Provide physical access to digital*

- 100% Broadband coverage
- 95% households with Internet access at home
- G-Cloud ready
- Modernized trust services infrastructure

# Azerbaijan Artificial Intelligence Lab

Artificial Intelligence Lab was established under the Ministry of Digital Development and Transportation to set a roadmap for the development of artificial intelligence in Azerbaijan and for the agile management of the national AI activity and aptitude.

- Researching and identifying current organizational and social issues
- Forming AI related policy proposals, strategies and concept
- Establishing and implementing AI models and applications
- Developing of NLP related Open Data platform
- Providing trainings in AI and Big Data

2

## DIGITAL LITERACY & HUMAN CAPITAL

## Technest Scholarship Program

---

- 3200+** GRADUATES
- 1863** NEW STUDENTS
- 43%** OF WOMEN PARTICIPANTS
- 29** REGIONS COVERED, WITH 1300+ PARTICIPANTS
- 91%** EMPLOYED
- 10** STUDENTS ADMITTED TO TOP-100 UNIVERSITIES

## Azerbaijan Cybersecurity Center

- The cybersecurity training center is holding dual-track training approach involving the red team (attack) and the blue team (defense).
- 60 students graduated, with the post-graduate employment rate of 78% and 120 additional participants will be granted with the right enroll to the program through 2 subsequent phases.
- Competitive Achievement at CIDC-2023: 5 graduates reached the finals in the Critical Infrastructure Defense Challenge 2023
- The teams that made it to the semi-final stage of the "WorldSkills" national competition were involved in the training process at AKM.

SERVICES

# Modules

 Life Events	 Digital Wallet	 Feedback
 Citizen Inbox	 Notification	 Payment
 Consent	 Data Sharing	 Ticketing
 Services Catalog	 Console	 Integration

## Life Events

Life's major events, from birth to bereavement

## Citizen Inbox

Citizen government communication

## Digital Wallet

Manage and view their essential documents

## Notification

Every government agency sends proactive messages to citizens

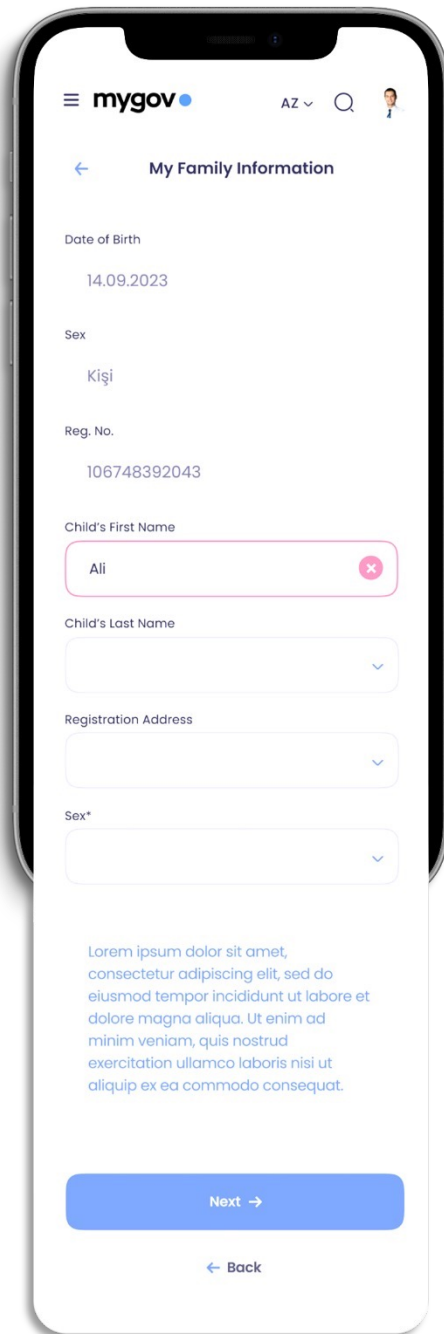

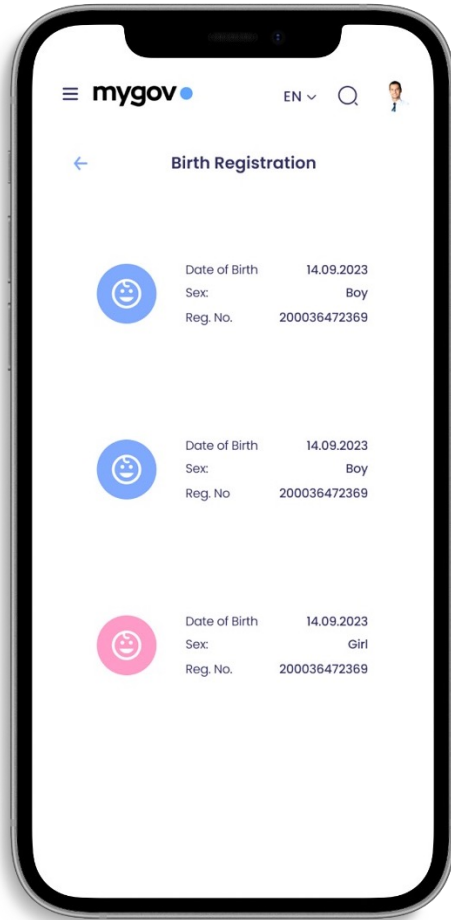

## Data Sharing

Share data details from government sources with organizations without bringing any physical documents

## Consent

Manage consents given to third-party applications to access your personal information

## Life Events

# Birth, Marriage & Death registration

The birth registration functionality on our “myGov” web platform provides a straightforward and efficient process for parents to officially register the birth of their child;

Users can access a user-friendly interface where they input essential details, such as the baby's name, date of birth, and parent information;

# Consent Management

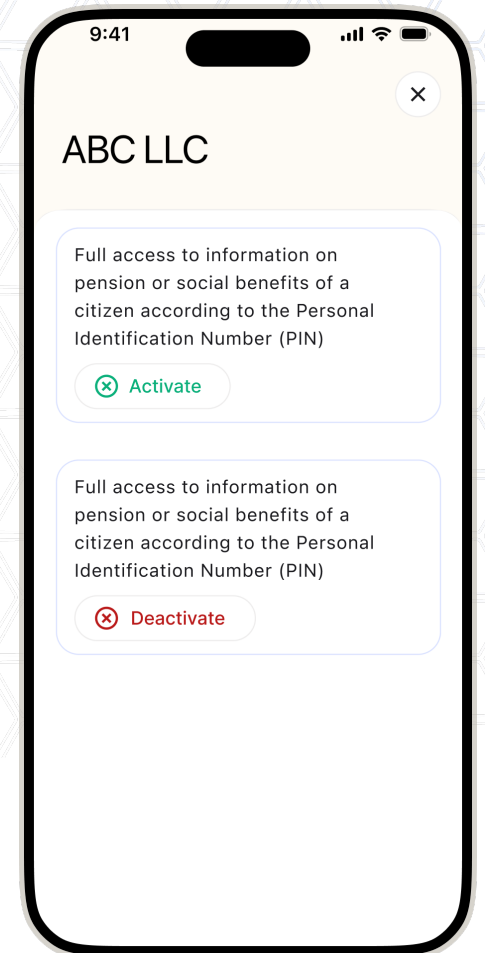

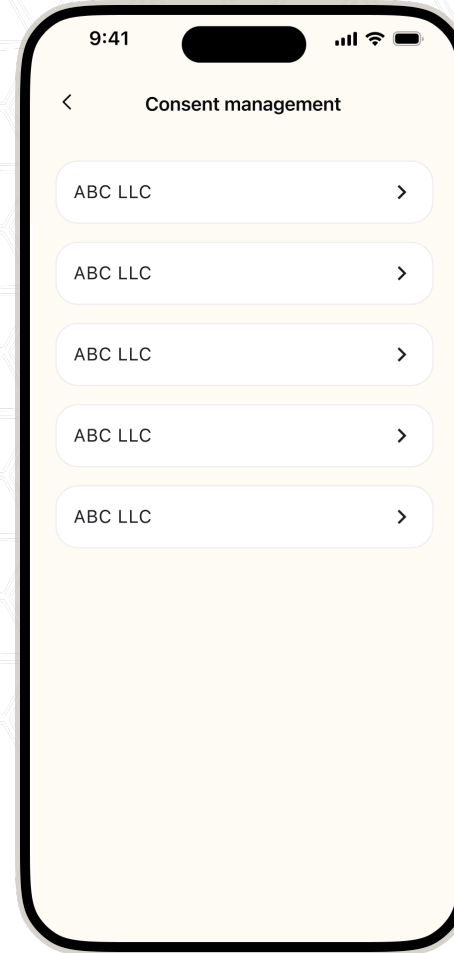

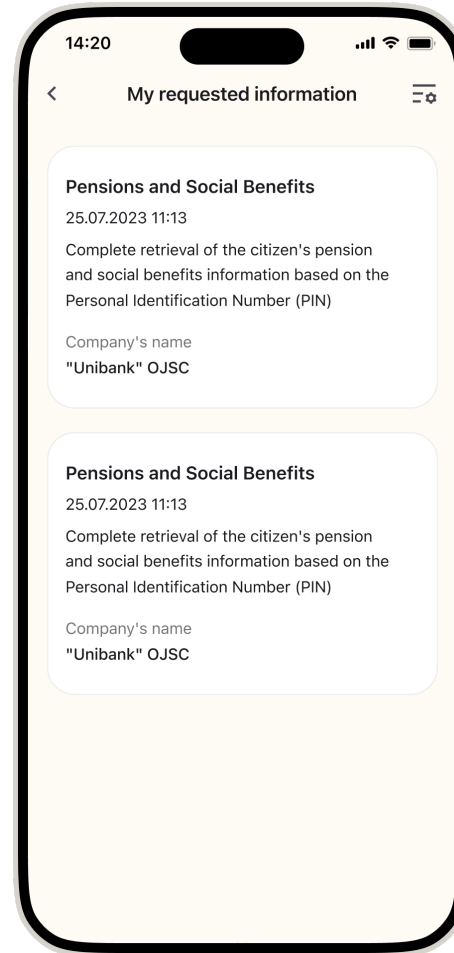

*Your privacy, our priority!*

“myGov” platform takes consent seriously, implementing robust consent management to safeguard user privacy.

Users have full control, easily granting or revoking consent for data processing with just a few clicks.

Transparent and user-friendly system ensures individuals notification about how their data is utilized.

With privacy at the forefront, “myGov” platform sets a new standard for responsible and secure data handling.

## SiMA

**SiMA** is a new generation of advanced digital signatures based on the cloud, public key, and face recognition technologies. SiMA is based on a mobile application and allows anyone to obtain electronic services more conveniently from anywhere and at any time, without needing additional tools.

### **Authenticity**

During the exchange of documents and information, it is possible to identify the sending party.

### **Confidentiality**

Since the information signed with SiMA Token is sent in an encrypted form, its confidentiality is ensured.

### **Integrity**

The integrity of the electronic document signed with SiMA Token is protected.

### **Non-repudiation**

It is impossible for the person who signed the document to refuse the signature.

 SiMA Token (Elektron İmza) ilə

 İdentifikasiya nömrəsi ilə

 SiMA Rəqamsal imza ilə

 Asan İmza ilə

Management

# digital bridge

Data exchange operations are carried out through a secure and fully encrypted channel.

More than 726 million data exchanges have been carried out since the beginning of the activity

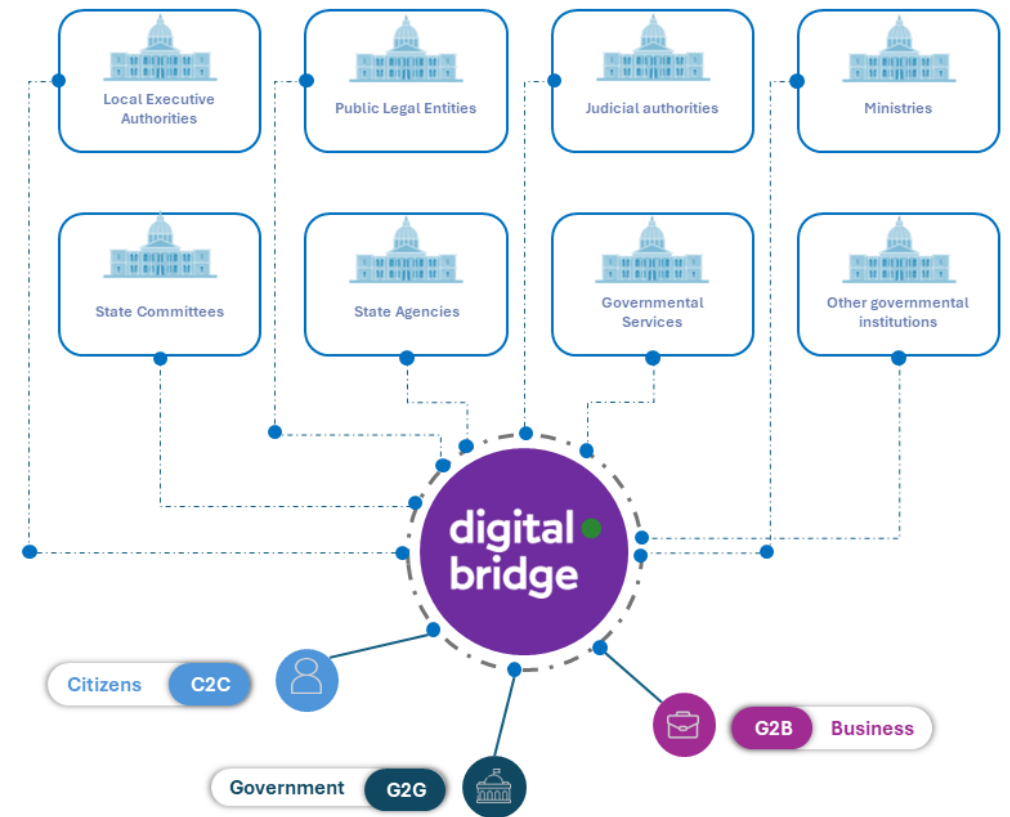

The workload of the system has increased 4 times

The volume of data exchange increased by 70% compared to the same period in 2022 and reached 372 million

140 information systems, 67 institutions are connected

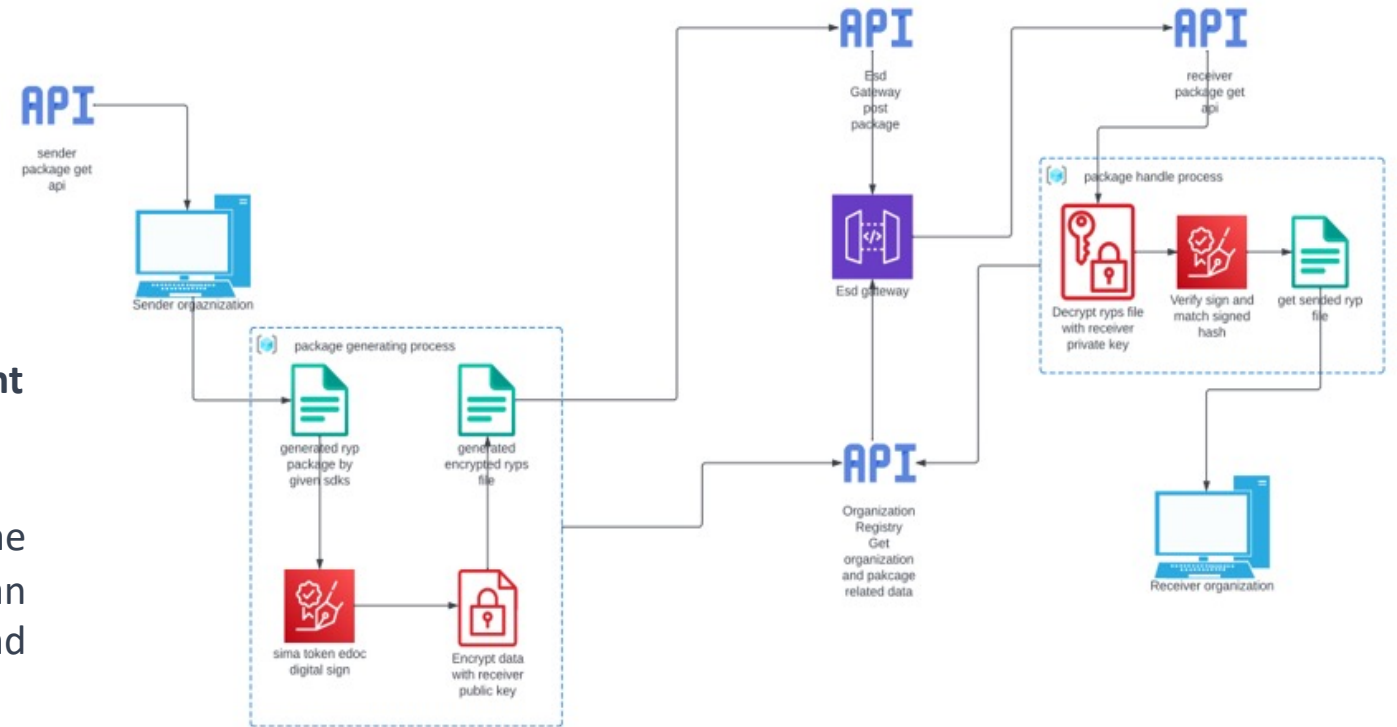

NON-STOP  
SHOP

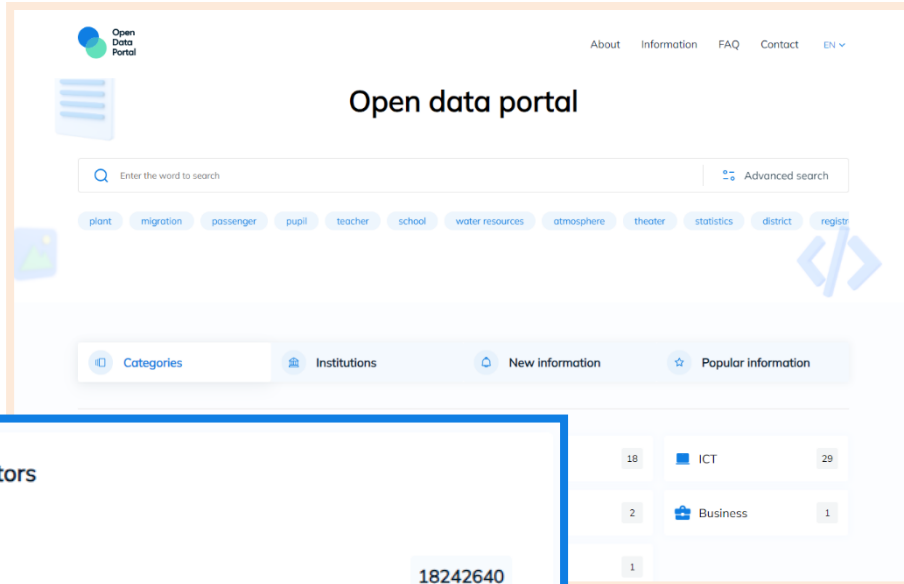

## Mission

- ✓ Modernizing Government Communication
- ✓ Ensuring Data Security and Compliance
- ✓ Promoting Digital Transformation in Government

By promoting electronic document exchange, the Gateway has played a pivotal role in saving an impressive total of 500,000 sheets of paper (and indirectly the trees) in Q1 of 2024.

# OPEN DATA

Open data is information that is accessible, usable, and re-shareable by everybody.

An open data portal is a system where these data are presented in human and machine-readable formats (JSON, XML, CSV, XLS, DOC, PDF).

The portal collects public information available throughout the country in a single system and presents it in various formats.

## The main objectives of creating an Open Data Portal:

- providing the access of public and private entities to open information collected in information systems;
- supporting the innovation ecosystem, startups, and entrepreneurs to create new data-based products and services;
- to create the possibility of obtaining information in different formats to conduct analysis and research.

# eProcurement System

## Announcements of forthcoming procurement

Active and expected announcements, Digital Financial Quote, e-Tenders

## Information about the results of procurement

Value of contract, validity duration, parties, procurement method, signature date

## Procurement Notifications

Contact person, Contact details, Reports, Untrusted suppliers, Digital Invoices

# eSocial System

## A unified system that combines social issues

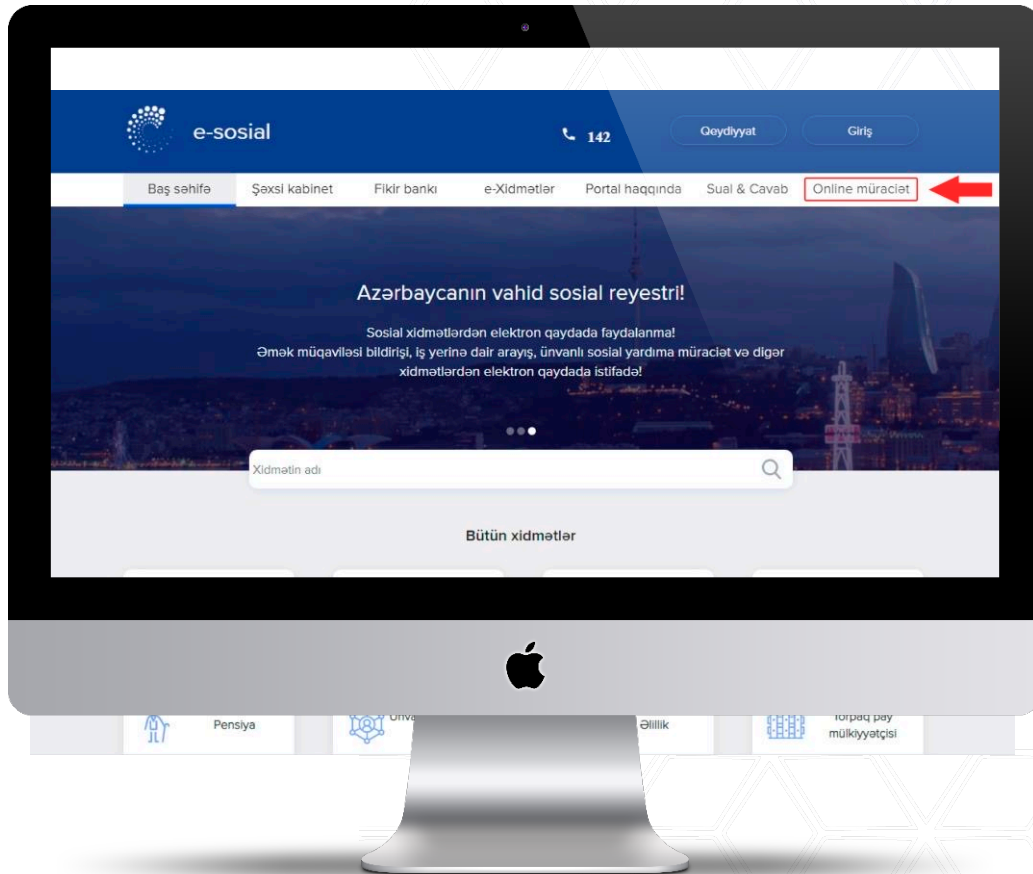

The portal, which includes 16 electronic subsystems and 2 registers, has access to the electronic database of various fields, such as employment contracts, personal accounting, pension capital, types of social security, land-share ownership, disability, and rehabilitation.

## Information about results of procurement

In the past period, 703.7 thousand pensions, allowances and pensions were determined proactively through the e-system. Of them, 106.7 thousand pensions, 597 thousand allowances and scholarships were assigned.

## Services

Employment opportunities for youth, applications for long-term care for the elderly, applications for social protection programs for the poor (below poverty line)/disabled/elderly, newborn benefits, disability benefits

# eCourt and Mobile Notary System

## A unified system that combines social issues

Information about the progress / decision / execution of the court case.

## Mobile Notary

Power of Attorney: Vehicles, Banks, Social issues, Lawyers. History of past power of attorney. Status and managing the power of attorney

## Expected Services

Land Title Registration and Certificate of conviction

AZƏRBAYCAN RESPUBLİKASI  
TƏHSİL NAZİRLİYİ

# eServices of Education System

## Services for Education System

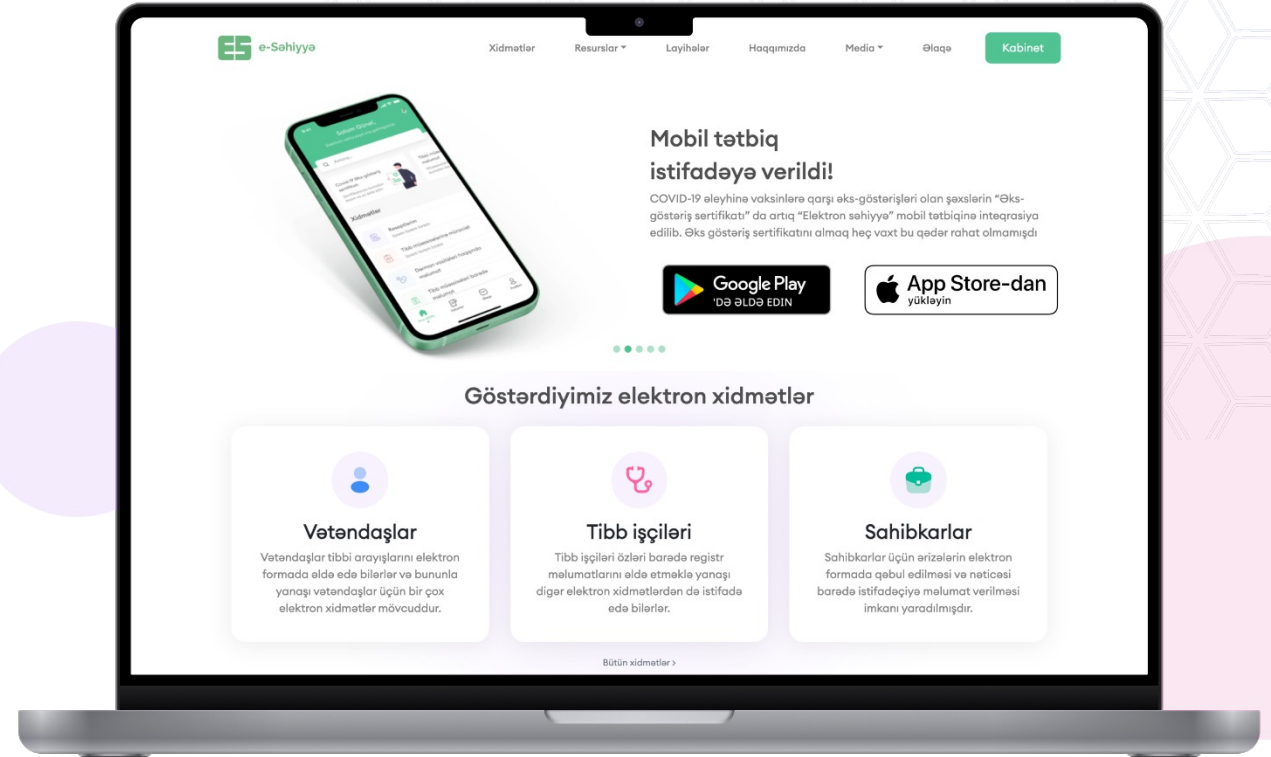

- Information and applications on scholarship opportunities in the field of education
- Online application for each level of secondary education
- Full online application for doctoral degree.
- Get a certificate online.
- Application for study abroad

# eServices for Healthcare System

## Services for Healthcare Issues

- Online purchase of medical certificates
- Online transfer of medical certificate for driving license
- Disease and examination history
- History of the results of medical examinations
- Apply for an online appointment for a doctor's examination
- Online application to the family doctor

Azərbaycan Respublikası  
Ekologiya və Təbii Sərvətlər  
Nazirliyi

# eServices for Ecological System

## Services for Ecological Issues

- Open data.
- Ecological calendar and warnings.
- ECO-RADAR – Reporting violation of ecological standards

# eServices for Agricultural System

## Services for Agricultural Issues

- Electronic Agricultural Information System
- Digital application for subsidies
- Online declaration of agricultural forecast

# ePolice of MIA

## Security Issues

- Driving License Info
- ID Info
- Passport Info
- Power of Attorneys for Vehicles: info and application
- Certificates: past and active
- Vehicle Ownership information: vehicles on search, under arrest, traffic incident certificates, health insurance certificates caused by traffic incident.
- Location of Police Stations: arranged by distance, district, infographic and sequence
- Fines: Paid fines history, unpaid fines, paying fines online, reporting unlawful fines
- Virtual 102: Online declaration to the police
- Notify of moving/changing an address online
- Receiving an affidavit of criminal record / background clearance
- Information on restrictions to leave the country

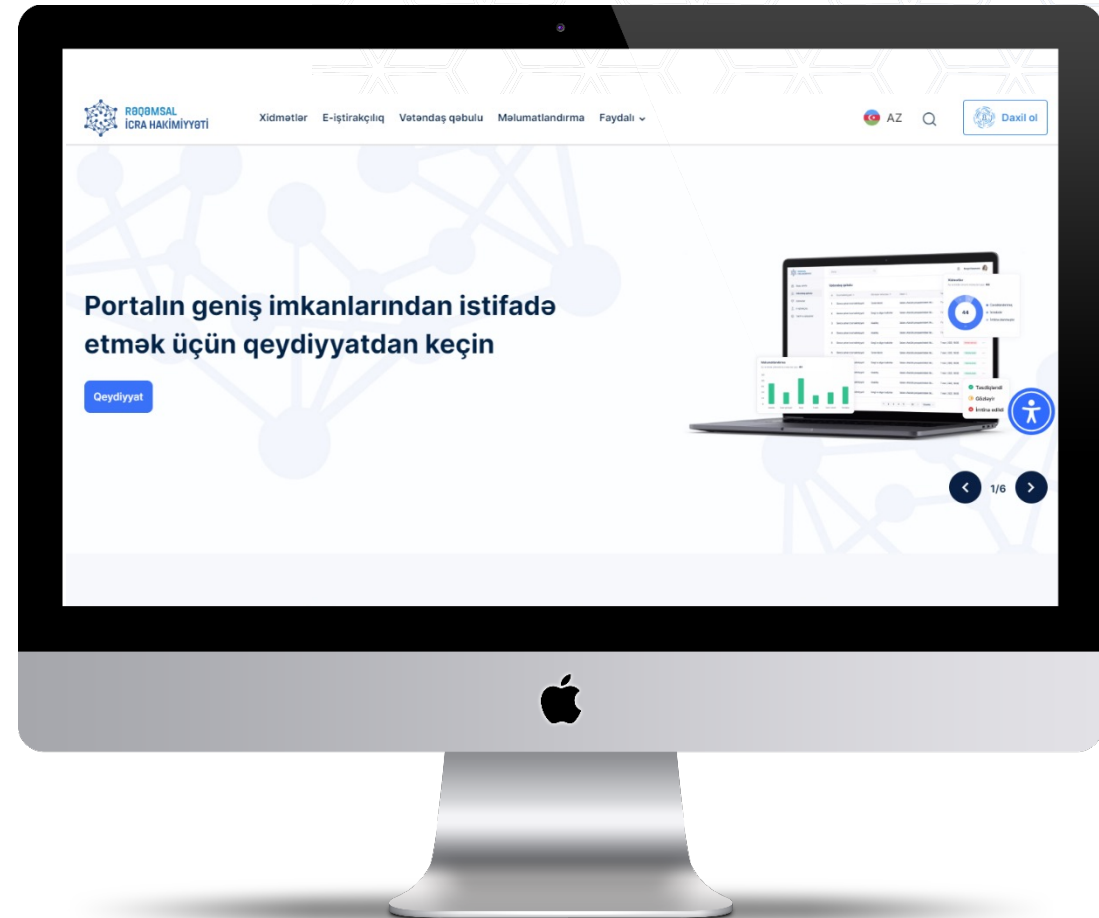

RƏQƏMSAL  
İCRA HAKİMİYYƏTİ

## RIH – Online Local Government

- Municipal government services through personal cabinets;
- Local e-Participation: Voting on initiatives, local consultation, citizen reception;
- User behavior analysis & statistics;

THANK YOU!
